- Python (basic data analysis)
- Canva & Adobe Creative Suite

Experience

Marketing & AI Projects – MBA Coursework

University Canada West, 2024–2025

- Designed an AI-assisted marketing campaign proposal for Netflix's ad-supported tier, including ad targeting, ethical considerations, and market adoption strategy.
- Conducted a comparative evaluation of LLMs (GPT-4, Claude, Gemini, Grok) for business applications in marketing, testing technical accuracy and ethical alignment.
- Developed market size analysis for a Vancouver transit mobile app, applying AI tools for data scraping and demand forecasting.
- Created organizational diagnosis report for MyChef Connex, applying AI-assisted frameworks (SWOT, Porter's 5 Forces, PESTEL) to refine HR and marketing strategies.

Web & Content Development

Freelance, 2022–2023

- Built and hosted a charity website in India to increase community engagement and donations.
- Applied SEO best practices and analytics tools to improve visibility.

Agricultural Research & Outreach

RAWE Program, TNAU, 2021–2022

- Conducted market and community studies on agricultural product adoption.
- Presented findings with actionable recommendations for farmers and cooperatives.

Selected Projects

- CompassTap Transit App – Designed a mobile prototype with AI-powered features (smart fare calculation, real-time notifications) for Metro Vancouver transit.
- AI in Meal Planning – Explored AI-driven personalization in affordable meal kits, aligning consumer preferences with supply chain efficiency.
- Story-Based Game Development – Conceptualized an AI-enhanced open-world gaming narrative to integrate user feedback loops into design.

Certifications

- Google Analytics & Ads Fundamentals
- Coursera: Introduction to Basic Game Development using Scratch
- HubSpot Inbound Marketing
